About Takeno

A hidden gem along the northern coast of Hyogo Prefecture. This beautiful beach is among the best and ranked in the top 100 beaches in Japan. Its crystal-clear waters have been given top marks by Japan's Ministry of Environment and they stretch along clean, soft, sandy beaches. Takeno is a quiet fishing town with beautiful nature, friendly residents, and traditional houses. The town features great hiking spots with views of the ocean and the entire town, as well as canoeing and swimming in the summer.

From the top of Mt. Jajayama, you can see a one-of-a-kind view of this beach and fishing town, with its blue seas and traditional houses. It is just a short hike up to the top and takes about 10-15 minutes.

Stroll through the streets of Takeno and see the traditional townscape, with houses that have charred wood walls.

Entrance to Mt. Jajayama

This long street that stretches all the way to the beach makes for the perfect photo spot!

When the weather conditions are just right, you can see the townscape mirrored on the quiet river surface.

Take in the clear blue ocean as you sip some coffee and rest on Takeno Beach. Soft white sand stretches 1 km along crystal-clear blue waters. This beach is a perfect destination for families and those seeking sun, beaches, and relaxation.

Listen to the gentle crashing of waves and the sweet chirping of migratory birds.
